San Francisco, CA • (925) 860-9912 • gauravchaulagain0@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

SUMMARY

I run enterprise rollouts at a logistics software company, reporting to the CEO, across teams of 40+. Separately, on my own time, I built a 6-agent Claude system my team now uses every day: it reads our meeting transcripts, writes each person's client follow-up in their own voice, and flags accounts going quiet before they churn. Before this I won Anthropic's "Best Use of Claude" at Cal Hacks 12.0, against 3,300+ participants.

EXPERIENCE

Technical Product Manager | FleetPanda

May 2026 – Present | San Francisco, CA

- Report directly to the CEO and own end-to-end execution of **7 enterprise implementations (\$1.7M+ combined contract value)**, directing **40+ people** across product, engineering, support, and QA to hold go-lives on schedule inside 6 to 8 week windows.
- Designed and shipped [Followloop](#), an internal AI app on the Claude API used by **15+ people daily**: it converts meeting transcripts into client follow-up drafts, action items, account-risk signals, and weekly status reports drawing on 90 days of history, at sub-7-minute latency end to end.
- Built the style-learning layer that drafts each user's client emails in their own voice, with an edit-feedback loop that improves output quality over time and drives daily adoption.
- Run technical discovery across client ERP, accounting, and WMS systems, then diagnose payload and integration failures to unblock stalled go-lives.
- Built a power-user champion model that resolves ~85% of user issues before escalation, scaling enablement without adding headcount.

Technical Product Manager | fAlshion Inc.

Jul 2025 – Oct 2025 | San Francisco, CA

- Shipped an agentic shopping experience end to end, owning the conversational agent flows from discovery to conversion.
- Built the agent evaluation framework (task completion, drop-offs, latency, accuracy) and used it to raise task completion from **62% to 81%** and cut failed responses 27%.
- Diagnosed agent-pipeline failures, including intent misclassification and fallback errors, and closed the gaps driving them.

Senior Technical Project Manager | WPCreative

Apr 2022 – Dec 2023 | Kathmandu, Nepal

- Owned delivery across **30+ enterprise and SMB clients** on a B2B SaaS platform serving 50K+ monthly active users and **\$600K+ in monthly revenue**, aligning engineering, design, and marketing to ship on schedule.
- Ran 4 major release cycles at **96% on-time delivery**; instituted QA gates and regression protocols that cut launch defects 32%.
- Led technical discovery across 18 client sites, translating ambiguous customer issues into engineering-ready fixes, including a page-load improvement from 8s to 2.5s.
- Built Metabase and Power BI dashboards that cut anomaly detection from 5 days to under 24 hours.

Associate Technical Product Manager | Hazesoft

May 2021 – Mar 2022 | Kathmandu, Nepal

- Drove delivery across DevOps, data engineering, and QA to onboard enterprise clients onto a cloud SaaS platform.
- Cut deployment time from **4 hours to 45 minutes** with automated checks and rollback routines, lowering manual effort 70%.

SELECTED AI PROJECTS

- Elda**: voice AI eldercare companion (Claude + Letta). Won "Best Use of Claude" at Cal Hacks 12.0 against 3,300+ participants. github.com/Gaurav890/Elda
- Vocal-Stack**: published npm toolkit for voice AI pipelines: LLM output sanitization for TTS, latency handling, flow control. npmjs.com/package/vocal-stack

EDUCATION

Master of Science, Computer Science | San Francisco Bay University

Dec 2025

GPA 3.8 (Top 5%) • Dean's List • Winner, "Best Use of Claude" at Cal Hacks 12.0 (Anthropic)

SKILLS

AI / Agents: Claude API, OpenAI API, multi-agent pipelines, agent evaluation, human-in-the-loop review, guardrails, RAG, prompt design

Technical: Python, SQL, REST APIs, webhooks, JSON, Supabase, Gmail API, Slack API, Git

Implementation: End-to-end onboarding, technical discovery, API and webhook configuration, data mapping, integration troubleshooting, go-live management
